If you want to enter another licence key purchased from cineklee.com before the key expires, click on 'Activate a licence purchased on cineklee.com' in your user profile. You can also activate another key after your licence has expired when you need to, by clicking on 'Licence' when you open your software.

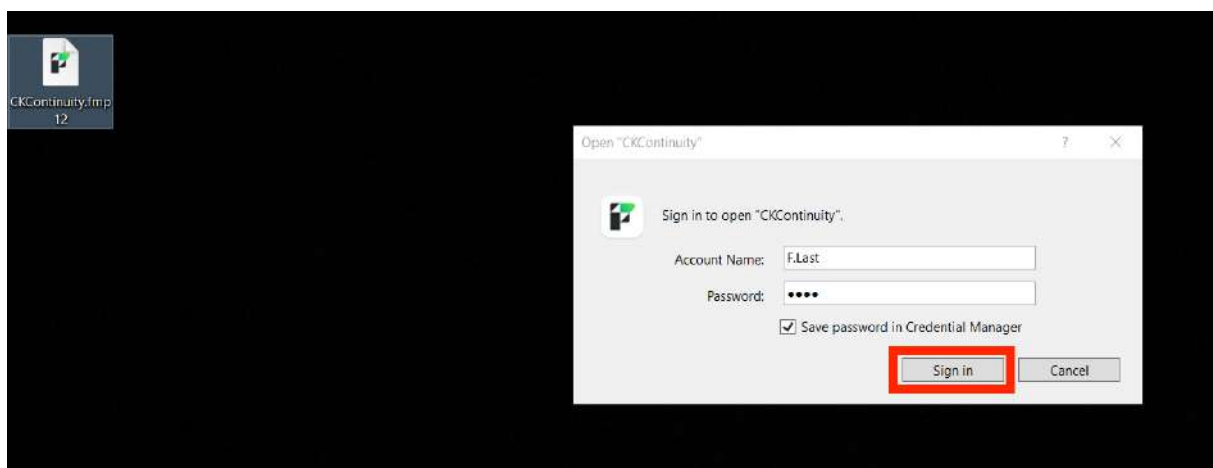

You will then be taken to the User account settings interface, where you can copy another key purchased from the website to activate it. The licence days will be added together automatically.

You can also exit CineKlee Continuity via the user profile.

To reopen the CKContinuity.fmp12 file, click on it: this window will appear. You will then need to enter your account name and password to reopen the file. Click Sign in.
